

A Reservoir at its Lowest

Al Massira, Morocco — measured from Sentinel-2, the full 2017 shoreline against the 2024 drought low

-91%

of the reservoir's water surface
lost between 2017 and 2024

98 km² → 9 km²

The reservoir refilled to 125 km² in 2026 after record rains. This map shows the drought low, not the end of the story.
